RE: Approval of the Interim Corrective Measure Report for the McDonnell Douglas
Aerospace Tract I Facility (A Wholly-Owned Subsidiary of The Boeing Company)
Hazelwood, Missouri, EPA I.D. No. MOD 000 818 963

Dear Mr. Haake:

The Missouri Department of Natural Resources' (MDNR) Hazardous Waste Program (HWP), in conjunction with the U.S. Environmental Protection Agency (EPA) Region VII, has completed review of the Interim Corrective Measure (ICM) Report, dated December 18, 1997, for the McDonnell Douglas Aerospace (MDA) Tract I facility located in Hazelwood, Missouri. The report was prepared by Heritage Environmental Services, Inc., on behalf of MDA following MDNR/EPA approval of the Interim Corrective Measure Plan on September 19, 1997. The ICM report discusses implementation of interim corrective measures for the environmental contamination associated with past releases of hazardous constituents from Solid Waste Management Units (SWMUs) 10, 22, 26, and 28 at the facility.

MDA has satisfactorily implemented the approved ICM plan in accordance with the Corrective Action Condition XIII. of the Hazardous Waste Management Facility (HWMF) Permit. MDNR hereby approves the Interim Corrective Measure Report. No further corrective action is required at this time for the SWMUs addressed through implementation of the interim corrective measures; however, these SWMUs will continue to be subject to the contingent corrective action conditions of the HWMF Permit.
